

Centre for Healthcare Redesign

Introduction to Accelerating implementation Methodology (AIM)

Learn how to improve the success rate of your projects

Accelerating Implementation Methodology (AIM) is a practical guide to effectively managing change by overcoming personal and cultural barriers. It's about learning how to address or remove obstacles that might prevent you from delivering projects on time, on budget and within scope.

AIM programs are flexible learning programs offered in most LHD/SHNs and at the ACI.

Successfully implement projects

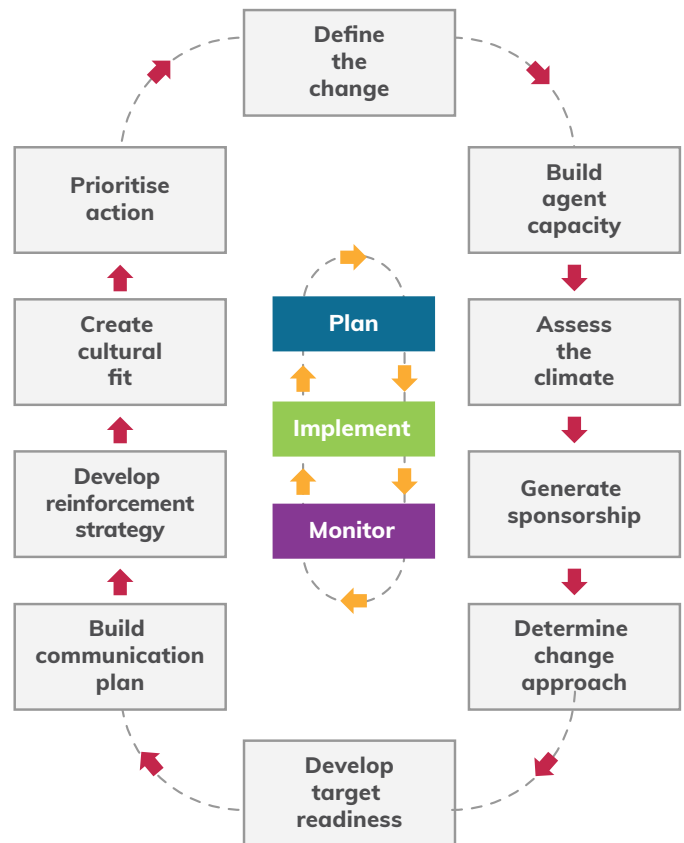

- On time
- On budget
- Meeting business, technical and human objectives

What do participants learn?

- A proven, repeatable 10-step process for accelerating implementation
- The difference between installation and implementation
- Four essential components required for change to succeed
- Why sponsorship is the most critical factor for implementation success, and how to create effective sponsorship
- Why managers and supervisors are integral to successful implementation
- That resistance to change is natural and how to manage it
- Which key deliverables should be a part of any implementation plan
- How to create a roadmap for success.

Flexible learning

- Two-day AIM program
- Online learning platform
- Sponsor workshops
- Executive briefings

Who benefits?

- Change leaders
- Project managers
- Training managers
- Clinical and non-clinical staff

Find out more about AIM

- NSW Health employees can access AIM online learning on My Health Learning (213401914): heti.nsw.gov.au/education-and-training/my-health-learning
- Course schedules: aci.health.nsw.gov.au/make-it-happen/centre-for-healthcare-redesign/accelerating-implementation-methodology-aim
- Contact your local Redesign Leader: aci.health.nsw.gov.au/make-it-happen/centre-for-healthcare-redesign/redesign-leaders
- Contact the ACI Centre for Healthcare Redesign on ACI-CHR@health.nsw.gov.au or (02) 9464 4728.
