

1

WATCH FOR:

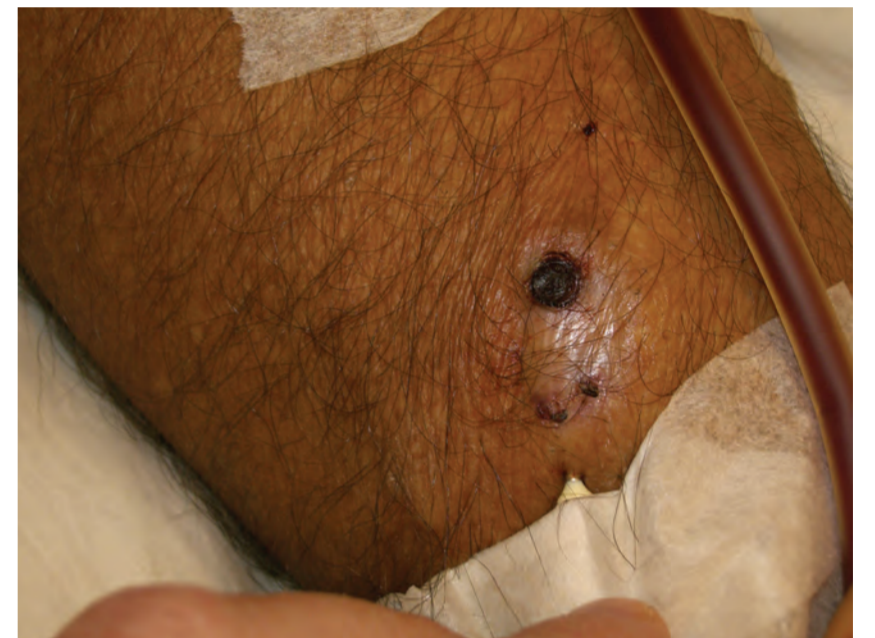

Sudden bleeding from your fistula or graft.

HEED THE HERALD BLEED

2

DANGER SIGNS:

- Cannulation site not healing
- Infected - red and swollen
- Bulging - expanding in size
- Feels harder than usual
- Has very thin or shiny skin

3

ACT QUICKLY:

- Report ANY **DANGER SIGNS** to staff
- Apply direct pressure to spontaneous bleeds
- Call **000** if bleeding does not stop, and continue applying direct pressure over the site.
