

Chronic Pain Services in NSW Partners in Pain Management

**For people with pain or healthcare professionals
considering a referral to a pain management service**

What is a Chronic Pain Service?

Chronic pain services provide access to a multidisciplinary team of experts for assessment and diagnostic services at one location. They also provide treatment and advice regarding medications, self management, lifestyle skills, and surgical options available. These recommendations are developed in partnership with you and your general practitioner.

A chronic pain service looks at the impact of pain on your activity level, and aims to improve quality of life by providing relevant information, treatment and advice. Learning self management skills is a critical component to a successful outcome, and a pain programme may be offered to learn these skills.

A team of healthcare professionals will be available including doctors, physiotherapists, psychologists and nurses, depending on your needs.

Who should attend Chronic Pain Services?

Chronic pain is pain that persists for more than 3 months or beyond the usual time for tissue healing.

If you have been living with pain that refuses to go away and it is affecting your daily life, you could ask your GP if a referral to a pain service would be worthwhile.

What to expect?

After your GP refers you to a pain service, you will be contacted and usually requested to complete a questionnaire. Returning the questionnaire is important, enabling appropriate services to be available for you at your appointment. If you need assistance to complete the questionnaire, support will be provided to you by the Chronic Pain Service.

Aims of a Chronic Pain Service

You will learn and be encouraged to:

- Find better ways to manage pain
- Increase activity and improve health and well being
- Make the best use of pain medications

How long is the waiting time for an appointment and what should I do in the meantime?

There are a growing number of pain services in NSW, however there is high demand, and waiting times for your initial appointment will range from weeks to months.

In the meantime, you should follow your GP's advice, remain as active as possible and gather information. For information and resources on pain and self management, the following books and websites may be useful.

For resources and tools on how to manage your pain go to:
