An Abbreviated Injury Scale (AIS) 2005 – Update 2008 Injury Scaling Uses & Techniques 2 day accreditation course will be held on Thursday 27th and Friday 28th October, 2016 at the Department of Epidemiology and Preventive Medicine (DEPM), Level 5, The Alfred Centre, Monash University, Melbourne. This is an excellent opportunity to either update previous training, as to maintain accreditation a course should be undertaken every four years, or undertake training for the first time.

What is the A.I.S?
The Abbreviated Injury Scale (AIS) provides researchers with a simple numerical method for ranking and comparing injuries by severity and to standardize the terminology used to describe injuries. The AIS is the foundation for the Injury Severity Score (ISS) which assesses the overall injury severity of the patient. The AIS has been universally accepted. Accurate and consistent application of the AIS is fundamental to sound injury data collection globally.

The program will be facilitated by:

Ms Jane Ford
Manager Australian Trauma Registry (ATR), DEPM, Monash University.

Dr Melanie Franklyn
Research Scientist in Injury Biomechanics, Land Division, DST Group.

Ms Christine Allsopp
Trauma Data Manager/Analyst, Royal North Shore Hospital
AAAM International Training Faculty
