

The NSW Institute of Trauma & Injury Management

An institute within the Agency for Clinical Innovation (ACI)

is pleased to present a specialised course on...

Injury Scaling: Uses & Techniques The Abbreviated Injury Scale (AIS) 2005 - Update 2008

2 day accreditation course

11-12th Dec, 2018 in Melbourne

On behalf of the **Association for the Advanced Automotive Medicine (AAAM)**

Venue:

Alfred Centre

Tutorial Room 5, Level 5
99 Commercial Rd,
Melbourne, VIC 3004

What is the AIS?

The Abbreviated Injury Scale (AIS) provides researchers with a simple numerical method for ranking and comparing injuries by severity and to standardize the terminology used to describe injuries.

The AIS is the foundation for the Injury Severity Score (ISS) which assesses the overall injury severity of the patient.

The AIS has been universally accepted. Accurate and consistent application of the AIS is fundamental to sound injury data collection globally.

Who should apply?

Trauma clinicians; Trauma data managers; Injury researchers; Public health and policy professionals.
